

AGH UNIVERSITY OF SCIENCE AND TECHNOLOGY

***International Conference on
Development and Applications of Nuclear Technologies
NUTECH - 2017***

Cracow, 10-13 September, 2017

Dear Colleague,

The International Conference on Development and Applications of Nuclear Technologies NUTECH 2017 will be held in Cracow, Poland from 10 to 13 September 2017.

The Conference main goal is to bring together scientists working on the development and application of nuclear technologies in the industry, medicine, agriculture and environment protection and the representatives of national and international regulatory bodies dealing with nuclear technology to report on current achievements in those fields and to discuss further research needs responding to expectations of modern society. The Conference has a long tradition in Poland where it started in 1960. The Conference topics include: (i) nuclear technology in medical health care and biomedical research, (ii) earth sciences and environment protection, (iii) protection of cultural heritage, (iv) industrial applications, (v) management of radioactive wastes, (vi) present status and future of nuclear energy, (vii) radiation protection, (viii) radiation measurements, (ix) data processing and acquisition, (x) quality control and quality assurance in nuclear technologies. The Conference is a joint organizational effort of several institutions including the AGH University of Science and Technology (Cracow) and Institute of Nuclear Chemistry and Technology (Warsaw), in cooperation with the International Atomic Energy Agency in Vienna.

Cracow, the capital of the Lesser Poland (Małopolska) region, is one of the major academic and cultural centers of Poland. It is the most popular tourist destination in the country with very good infrastructure and numerous activities. The historic centre of Cracow has been inscribed in the UNESCO World Heritage list as "one of the most outstanding examples of European urban planning, characterized by the harmonious development and accumulation of elements representing all architectural styles from the early Romanesque phase up to Modernism."

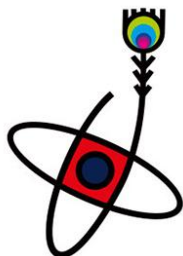

Preliminary information and important dates are available on <http://nutech-2017.agh.edu.pl/>.

See you in Cracow.

Sincerely Yours,

Marek Lankosz

Chairman of the Conference Organizing Committee
